

THE LABORERS UNION

Environmental Remediation Professionals

ASBESTOS ABATEMENT

Skilled Construction Laborers Union members are trained to perform all aspects of asbestos abatement in accordance with Minnesota Department of Health regulations. Union Laborers collect air samples, and perform all work related to enclosure, control, removal, encapsulation and disposal of asbestos containing materials.

HVAC CLEANING & DECONTAMINATION

Laborers Union members clean heating, air conditioning and ventilation systems removing surface contaminants and deposits within the systems.

LEAD ABATEMENT

Laborers Union members perform lead abatement work inclusive of encapsulation and removal of materials containing lead, lead contamination/emergency cleanup and preparation of area.

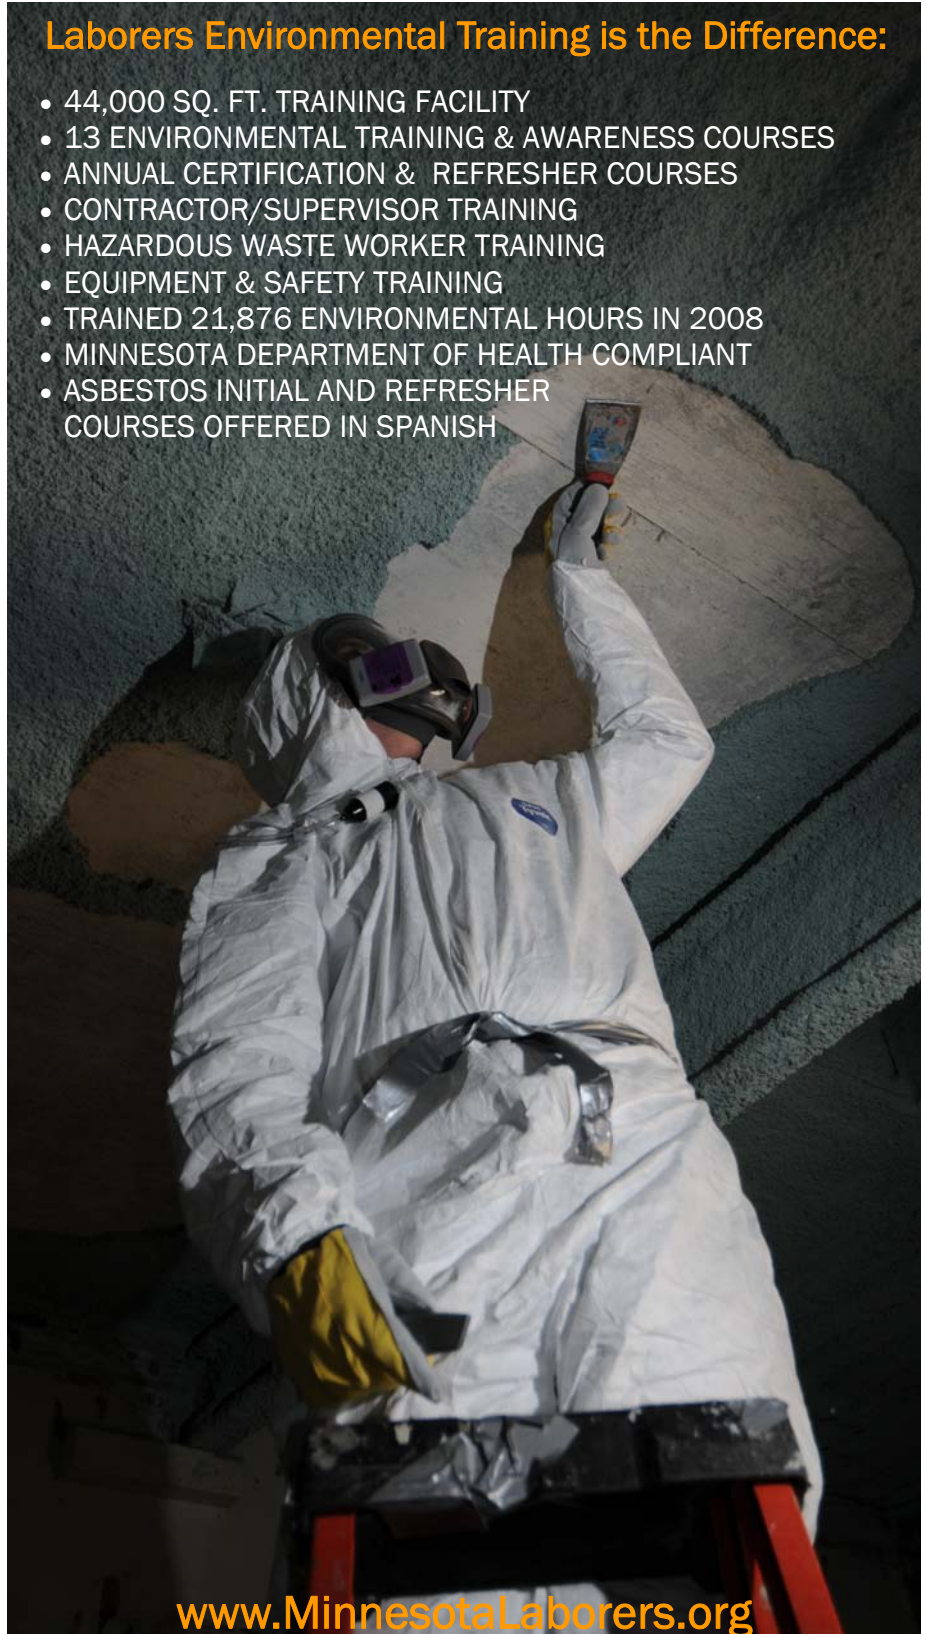

MOLD REMEDIATION

Laborers Union members perform all work in connection with the enclosure, handling, control, removal, encapsulation and disposal of mold or materials which contain mold. This includes disinfection of structures or surfaces exposed to mold and the application of final coatings.
